## (54) SOCKS AND THEIR PRODUCTION

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain socks capable of preventing a thumb side from feeling pressure, etc., imparted thereto by forming the sock so as to be resemble to the shape of a foot as possible.

SOLUTION: This sock 10 obtained by carrying out circular knitting by a sock knitting machine has an asymmetric shape in which the tip position G of the toe part 12 is positioned at the position slanted toward the thumb side 16, and a thickness-increasing knitted part 20a and 20b for increasing the thickness of the toe part 12, and knitted so as to be slanted to the thumb side 16 of the toe part 12.

## LEGAL STATUS

[Date of request for examination] 30.04.1998

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2895473

[Date of registration] 05.03.1999

[Number of appeal against examiner's decision  
of rejection]

[Date of requesting appeal against examiner's  
decision of rejection]

[Date of extinction of right]
